1-Year stock performance (HK\$)

Wanda (3699 HK) An outperformer in rate cut cycle

- Core profit surged 117% YoY to RMB 2,264mn in 1H15
- For property sales business, presales grew 10%YoY to RMB 61bn while gross margin improved by 0.5ppt YoY to 39.5%
- Rental revenue grew 31% YoY to RMB 6.3bn. On a like-for-like basis, retail sales grew 11%YoY for Wanda's shopping centers in tier-1 cities and 13%YoY in tier-2/3 cities.
- The asset-light model should reduce Wanda's capex and gearing in future.
- With 91% of total debt raised onshore, Wanda's finance cost saving should increase further on the recent rate cut
- Maintain BUY with TP of HK\$ 75.40 (from HK\$ 88.00) based on a 50% discount to FY15E NAV.

Core profit increased 117% YoY to RMB 2,264mn in 1H15. Wanda 1H15 core profit increased 117% YoY to RMB 2,264mn as revenue increased by 33%YoY to RMB 30.9bn. Wanda delivered strong operating metrics in its two core segments:

- 1) Property sales booked sales increased 29%YoY to RMB 21bn, driven by higher GFA delivery (+12%YoY to 1.72mn sqm) and booked ASP (+15%YoY to RMB 21k/sqm). In 1H15, presales also went up 10%YoY to RMB 61bn, in line with the average growth of 11% YoY among peers. Margin-wise, gross margin improved by 0.5ppt YoY to 39.5% in 1H15, which is impressive given the sector-wide decline in margins resulted from an oversupplied property market in 2014. We believe Wanda is one of very few players who can achieve a double-digit growth in presales while keeping its gross margin at above 35%.
- 2) Property leasing rental revenue increased 31% YoY to RMB 6,345mn. LFA of Wanda's shopping centers reached 12.06mn sqm in 1H15 (5% higher than FY14) while average rent improved to RMB 97.29/sqm/mth (8.3% higher than FY14). Retail sales of Wanda's shopping centers were strong at RMB 54.6bn in 1H15. On a like-for-like basis, retail sales of Wanda's grew 11%YoY for shopping centers in tier-1 cities and 13% in tier-2/3 cities. We believe growth in 2H15 may accelerate further because of a) an increasing number of Wanda Plaza to be launched. Given that only five of the 26 new shopping centers commenced operation in 1H15, the rest is like to be opened in 2H; b) Adjusting tenant mix. In the past few years, Wanda leased a substantial portion of its GFA to department store business and KTV owned by its parent group. In 2015, as its parent decided to scale down unprofitable operations, Wanda can replace those GFA with third-party tenants providing higher returns. Wanda will terminate ~50% of the department store GFA and 20 of the 60 KTV centers, hence we expect rent rate to rise by 20-40% with the new leases.

A shift to an asset-light model to lower gearing. Wanda also announced its switch to an asset-light model through the KuaiQian platform. Under the cooperation framework agreement, KuaiQian (68.7% owned by Wanda's Chairman, Mr. Wang Jianlin), an online payment and finance company, will be responsible for raising fund for the land and construction cost, while Wanda will provide construction management and operation management of the properties injected. *Net gearing=Net debt/Total Shareholders' equity Source(s): Bloomberg, ABCI Securities estimates

When the shopping centers begin operation, Wanda will share 30% of the net property income while the remaining 70% will be entitled to its partner, KuaiQian. In the first seven years of operation, KuaiQian will be guaranteed an annualized return on investment of 7.5%; any shortfall will be compensated by Wanda's 30% share of the profit. If the actual return exceeds 7.5%, Wanda's profit-sharing ratio will increase. We believe Wanda will use the platform to fund the development of the Wanda Plazas, and net gearing should fall substantially in the long run as the Group will no longer be bearing the land and construction costs. In its early stage of cooperation, Wanda will transfer five Wanda Plazas to the platform for a consideration of RMB 1.035bn (at 1.03x P/B). The total investment is estimated to be RMB 4.75bn.

Beneficiary in a rate cut cycle. Although Wanda's net debt increased 32%HoH to RMB 116bn and net gearing jumped 17.0ppt HoH to 73.7%, net finance cost decreased 2%YoY to RMB 3.76bn while average borrowing cost dropped from 7.51% in FY14 to 6.96% in 1H15. Such impressive improvements were driven by 1) a series of rate cut in China since end-2014. Offshore debt (RMB15.1bn) only accounted for 8.68% of total debt in 1H15. The majority of debt was raised onshore and PBOC rate-linked. Further rate cut in China will save interest expenses for onshore borrowing, while interest rate of offshore debt may rise upon expected rate hike in the U.S. towards end-2015; 2) Active refinancing for trust loan repayment. Trust loan accounted for 20.98% (RMB 36.5bn) of total borrowing by 1H15 and entails a rather high interest cost. Wanda raised RMB10bn with the 5-year note at a 4.6% coupon rate on Aug 3, 2015. The Group raised another RMB 5bn in domestic corporate bond with a 5-year maturity and a coupon rate low at 4.09%. As net finance cost represented close to 20% of Wanda's EBIT in 2014, reducing interest cost will have an immediate positive impact on its net profit.

Maintain BUY with unadjusted TP of HK\$ 75.40. We lift our FY15E NAV estimate from HK\$146.6 to HK\$150.8 to factor in the strong interim results. We lower our TP to HK\$75.40 (from HK\$88.00) with a higher NAV discount of 50% (from 40%) based on the recent market correction and de-rating of China's property sector on forex debt exposure. Wanda is our top BUY for China's property sector, given its strong rental revenue growth outlook and reduced financing cost.

Risk factors: 1) Rising online retailing in China; 2) Substantial government grant received; 3) Significant related-party transactions;

Disclosures

Analyst Certification

I, Tung Yiu Kei Kenneth, being the person primarily responsible for the content of this research report, in whole or in part, hereby certify that all of the views expressed in this report accurately reflect my personal view about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report. I and/or my associates have no financial interests in relation to the listed company (ies) covered in this report, and I and/or my associates do not serve as officer(s) of the listed company (ies) covered in this report.

Disclosures of Interests

ABCI Securities Company Limited and/or its affiliates, within the past 12 months, have investment banking relationship with one or more of the companies mentioned in the report.

Definition of equity rating

Rating	Definition
Buy	Stock return ≥ Market return rate
Hold	Market return – 6% ≤ Stock return < Market return rate
Sell	Stock return < Market return – 6%

Stock return is defined as the expected % change of share price plus gross dividend yield over the next 12 months

Market return: 5-year average market return rate from 2010-2014

Time horizon of share price target:12-month

Definition of share price risk

Rating	Definition
Very high	2.6 ≤180 day volatility/180 day benchmark index volatility
High	1.5 ≤ 180 day volatility/180 day benchmark index volatility < 2.6
Medium	1.0 ≤180 day volatility/180 day benchmark index volatility < 1.5
Low	180 day volatility/180 day benchmark index volatility < 1.0
We measu	re share price risk by its volatility relative to volatility of benchmark

We measure share price risk by its volatility relative to volatility of benchmark index. Benchmark index: Hang Seng Index.

Volatility is calculated from the standard deviation of day to day logarithmic historic price change. The 180-day price volatility equals the annualized standard deviation of the relative price change for the 180 most recent trading days closing price.
